

***SYMPHONY OF GENERALIZED PAIRS, FOLIATIONS, AND KÄHLER
MANIFOLDS***

Speaker: Jihao Liu

Northwestern University

Time: Wed., Jun 7, 14:00-15:30

Venue: Room 106, SCMS

Abstract:

Generalized pairs, foliations, and Kähler manifolds are three objects in the study of birational geometry. In this talk, I will discuss the connection between these three seemingly unrelated topics from the viewpoint of the minimal model program. Through exploring these connections, I will discuss the potential implications of these topics.
