

LIIOUVILLE THEOREM OF FULLY NONLINEAR ELLIPTIC PDEs

Speaker: Chuanqiang Chen
Ningbo University

Time: Fri, Oct. 17th, 15:00 - 16:00

Venue: Room 102, SCMS

Abstract:

Liouville Theorems for semilinear and quasilinear elliptic PDEs are well known. In this talk, we establish some Liouville Theorems for fully nonlinear elliptic PDEs, including k -Hessian equations (and inequalities), Hessian quotient equations (and inequalities), and mixed Hessian quotient equations (and inequalities), which is a joint work with Lianggen Hu, Yan Ma, and Botao Wang.
