The Moduli Spaces of KSBA Stable Varieties and Pairs II

Speaker:Wenfei Liu
Xiamen University

Time:Thu., Apr.2nd, 15:00-17:00

Venue:Room 102, SCMS

Abstract: In the second lecture, I will survey known examples of explicit KSBA compactification of non-projective moduli spaces of varieties and pairs. The focus is on the stable surface pairs, about which much progress has been made in recent years. Here, by "explicit KSBA compactification", it is usually meant an "explicit" description of the boundary of the compactified moduli space, given that an open part of the compact moduli space is already known.
